

Loki-100G-5S-2P

2-port 100GE test module

The Loki-100G-5S-2P is a 2 port 100GE test module that can also test these Ethernet network speeds: 50GE, 40GE, 25GE and 10GE. This unique flexibility is provided via two physical transceiver cages, both supporting QSFP28 and QSFP+ transceivers. Both cages can be active simultaneously.

The result is a highly versatile solution for performance and functional testing of network infrastructure and Ethernet equipment capable of supporting 100GE such as switches, routers, NICs, taps, packet-brokers, and backhaul platforms.
